DEADLINE

Going forward, all projects and exercises must be transferred to the shared class github repository as they are completed by their due date. You have up until the last day of class to make revisions to your projects for a better grade. All file bundles are due by the last day of class, Wednesday December 9th.

DELIVERY

In tandem with your upload to Github, create a zip file of all of your work and share with me via Google Drive or Dropbox link. This should be completed on the last day of class.

ORGANIZATION

All of your project and exercise files should be organized within their own folders and those folders should all be in a main folder using your first name. Please remove any extra non-essential files that you do not want evaluated.

Follow these folder naming and organization conventions in your bundle:

Example of how to link to your projects and exercises from your index.html:

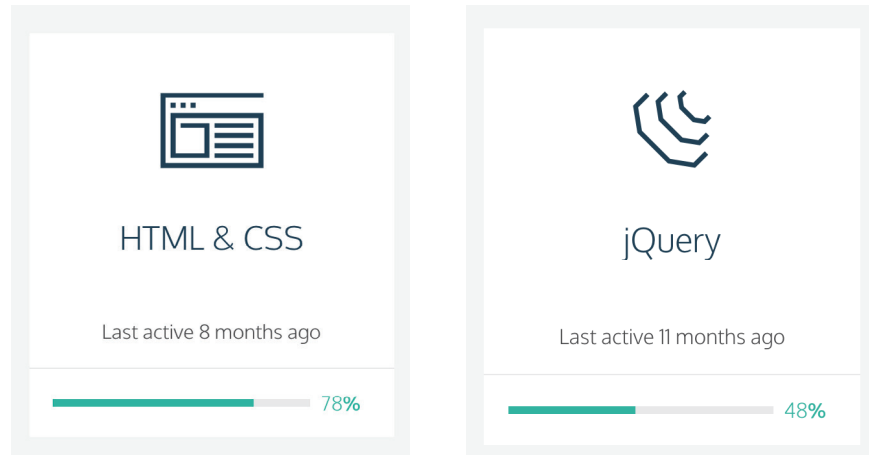

```
<a href="projects/project1/index.html"> Project 1</a>
```

Codecademy Tutorials

TUTORIALS

By the end of the semester, you will need to have completed the following tutorials on Codecademy:

HTML
CSS
jQuery

Screenshot Essentials

SCREENSHOT NAMING FORMAT

Please screenshot your web browser to track your progress on Codecademy.

Your screenshots must show your account info and must follow this naming convention to be counted:

FirstName LastName + Default file name + png

Type your name at the beginning of the filename leaving the default file information for the screenshot intact.

Your user avatar and “Finished” box should be visible:
